

FLYNN STAIRCASE LOFT BED WITH CHEST END OR DESK END

SAFETY WARNINGS

SAFETY FIRST!

All Bunkbeds were designed and manufactured with **your child's safety as our top priority.**

Their unparalleled strength is a bi-product of the safety design. Our bunks meet all compliance with ASTM F 1427-13 "Standard Consumer Safety Specification for Bunk Beds" and Code of Federal Regulations (CFR) 1213 "Safety Standards for Entrapment Hazards in Bunk Beds" and (CFR)1513 "Requirements for Bunks Bed".

Safety is a cooperative effort between us as the manufacturer, and you as a guardian. **Please read and consider the warnings listed on this page** when choosing a mattress and discussing rules of use with your child.

1. Follow the information on the warnings appearing on the upper Bunk end structure and on the carton. Do not remove warning label from bed.
2. Always use the recommended size mattress or mattress support, or both, to help prevent entrapment or falls.
3. Surface of mattress must be at least 5 inches (127mm) below the upper edge of guardrails.
4. Do not allow children under 6 years of age to use the upper Bunk.
5. Prohibit more than one person on the upper Bunk.
6. Periodically, check and ensure that the guardrail, ladder, and other components are in their proper position, free from damage, and that all connectors are tight.
7. Do not allow horseplay on or under the bed and prohibit jumping on the bed.
8. Always use the ladder for entering and leaving the upper Bunk.
9. Do not use substitute parts. Contact the manufacturer or dealer for replacement parts.
10. Use of a nightlight may provide added safety precaution for a child using the upper Bunk.
11. Always use guardrails on both long sides of the upper Bunk. If bunk bed will be placed next to the wall, the guardrail that runs the full length of the bed should be placed against the wall to prevent entrapment between the bed and wall.
12. The use of water or sleep flotation mattresses is prohibited.
13. **Keep these instructions for future reference.**

STRANGULATION HAZARD

Never attach or hang items to any part of the bunk bed that are not designed for use with the bed; including, but not limited to, hooks, belts and jump ropes.

SIZE OF MATTRESS AND FOUNDATION

Use only mattress which is 74 - 75 inches long and 37½ - 38 ½ inches wide on upper Bunk. Ensure thickness of mattress does not exceed 8 inches and the mattress is at least 5 inches below upper edge of guardrails.

WARNING

Important Safety Notice

Dresser/chest can tip (fall over) when not used as intended. This could potentially result in serious injury or death. Keep your children and others safe by following these simple rules:

1. Do not allow climbing on any dresser/chest.
2. Do not leave drawers open when not in use.
3. Do not allow standing in drawers.
4. Do not allow standing on top of dresser/chest.
6. Do not place heavy objects in drawers.
7. Do not place heavy objects on top of the Dresser/chest which can be pulled down on top of your child.
8. To avoid head injury, do not allow your child to play underneath open drawers.
9. Hutches mirror, etc. Must be securely fastened to the dresser according to the instructions enclosed with those items.
10. Always monitor your child's activity when in the nursery.

CARE INSTRUCTIONS

Page 26 of 26

- A lacquer finish is used on this furniture to protect the wood. **It is not waterproof, clean spills immediately.** Dust using a slightly damp cloth, making sure no standing water is left on the furniture. **DO NOT** use any household cleaners, citrus-based polishes, wood soaps, or oils; they can break down the natural lacquer finish.

- **Do not place furniture in direct sunlight.** Natural solid wood furniture will naturally color as it ages, however, direct sunlight dramatically speeds up the process.

- In natural wood furniture, the variations in texture and grain **will affect the finish**, making it impossible to guarantee an exact match between two pieces of wood even though identical finishing processes are used. These differences in character **are not defects**, but variations that make each piece of furniture unique and beautiful.

- **Solid wood naturally expands and contracts.** In high humidity you may find that drawers can stick slightly. This will correct itself, and is not reason for concern.

- **Do not place furniture over heating or cooling vents.** Dramatic changes in temperature can cause the wood to split.

•

If you place objects such as lamps or plants on your case pieces **make sure to move them from time to time.** There may be a slight discoloration where the object was. However by exposing it to the light the color will catch up the rest of the case.

- Plastic or foam footed items such as phones or clocks can damage this finish, **use trivets under such items.**
