THE NEST SEATING SERIES

THE NEST SEATING SERIES

A comprehensive collection comprised of guest chairs, lounge seating and complementary collaborative and satellite tables created to enhance social connection and nurture collaboration. Designed by Todd Bracher for HBF, Nest offers a refined solution easily adaptable to many environments. The combination of the semi-translucent mesh back and steam-bent wood gives the chairs a sense of lightness and sophistication; enhanced by the gracefully slanted arms and beautifully detailed polished base.

Nest lounge chairs featuring the Chalk white mesh, complemented by Bianco White painted frame. The polished stainless steel base, with optional self-return swivel, enhances the adaptability and functionality of the chairs and tables.

03

"Nest is about relationships...relationships we have to each other, technology and communication"...Todd Bracher

02

Generous seat proportions accommodate the user in various situations, from relaxed postures to working positions. The ergonomic low back and tension in the woven mesh back naturally forms support for the body. Designed to stand alone or in a group, Nest creates an exquisite aesthetic in any environment.

When used in groups, Nest seating and tables are shaped to allow a strong spatial relationship with other participants. The addition of Nest tables expands the usefulness of this collaborative area.

Nest guest seating is offered with wood legs in addition to the stainless steel base. Finished in Caramel on maple, this chair utilizes a light gray mesh for the back upholstery and, on the seat, a 100% wool fabric available from HBF Textiles. The collaborative table has a grommet with optional power/data access to support technology requirements.

The monochromatic white guest chairs create a pristine aesthetic suitable for many corporate areas. Nest seating provides the client multiple texture and color combinations: a variety of mesh colors, 18 standard finishes on maple, white painted finish, polished stainless steel base and endless seat material options.

08

“Collaboration may not always require laptops, but sometimes notebooks, sometimes even just a cup of coffee and we took all of these scenarios into consideration”... Todd Bracher

07

Side chairs create an impromptu working environment when the Nest satellite table is pulled in close to the user. Lightweight and easily repositioned, the pieces may instantly be placed in multiple collaborative settings to support the changing requirements of users.

The light-weight, exquisite bent wood frame, combined with the translucency of the innovative mesh material, offers a versatile solution that is easily movable while providing a refined aesthetic when perceived from any angle.
