

# ADDING OR REMOVING DURAFOAM® TO CUSTOMIZE YOUR COMFORT

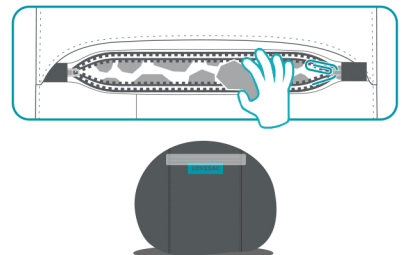

- 1** Remove your Sac Cover by zipping upwards as you rotate the Sac. Untie loops, and set Cover aside.

- 2** Unzip first zipper on Sac Insert.

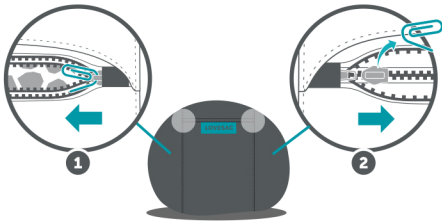

- 3** As a safety measure the second inner zipper has been disabled, but can be opened by an adult with a paperclip.

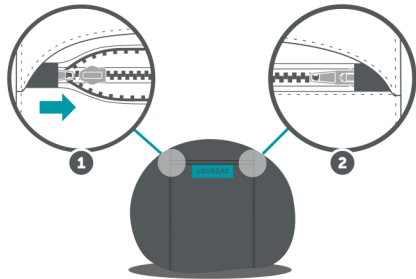

- 4** With zippers open, insert foam into Sac Insert.

**TIP** To limit the mess, have someone hold the zippers open as you slowly transfer the foam.

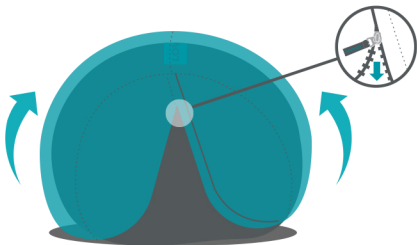

- 5** After adding any additional foam, close zipper with paperclip. Once closed, remove paperclip.

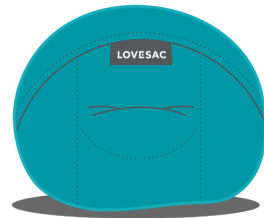

**!** To maintain safety and prevent accidental opening by a child, ensure zipper is completely closed and paperclip removed.

- 6** Zip top zipper closed.

- 7** Put Cover back on by pulling the two sides of the Cover together as you zip downwards, rotating the Sac as you zip.

- 8** Fluff your newly filled Sac, punch yourself a nice seat and experience **Total Comfort!**
