

# SETTING UP YOUR SACTIONALS

## 1 Lay down Shoes

Make sure you place the Shoes face up so that you can see the alignment marks.

Every Sactionals configuration starts with four Shoes. Start building in the middle of your room and build out from there. Visit [lovesac.com](http://lovesac.com) for configuration inspiration.

## 2 Place Seat Frame

Shoes can pivot left or right to receive other pieces

Make sure that you leave the Shoes sticking out where you need to connect other Seats or Sides.

Place your Seat Frame on top of the 4 Shoes, inserting the Feet on the Frame into the holes in the Shoes. Adjust the Shoes so they are straight and square with the alignment marks to make adding pieces easier.

## 3 Continue to lay out Shoes

You can turn a Seat 90° to turn corners, make a deeper seat, or to add a chaise seat to your configuration.

Lay out more Shoes on either side of your first Seat Frame and align them as close as you can to the right spot. Notice how we set up the left side in a deep position.

## 4 Add more Seat Frames

Do not insert any clamps until you have all Seats and Sides arranged.

Place two more Seat Frames on the Shoes that are exposed. Again, adjust the Shoes so they are straight and square with the alignment marks. Notice that this configuration will not require Shoes at the end of the chaise ottoman.

## 5 Add Sides

When placing the Sides, make sure Shoes are nice and square with the Seats and insert Side at an angle.

Once you have all of the Seat Frames in place you can add the Sides.

## 6 Clamp Together

Clamps can be used to connect a Seat to a Seat when Shoes don't connect them together.

Use the steel Clamp to attach all Sides to the Seat Frames to complete our patented system.
