

# COVERING A STORAGE SEAT

## 1 Cover the Storage Seat Frame

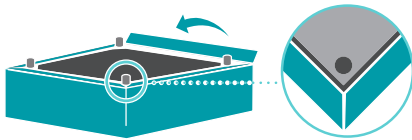

Align all 4 corners of the Cover with the top of the Insert before attempting to pull the Cover down. Pull Cover down equally on all four sides, checking corner alignment as you pull.

## 2 Attach Cover to top of Insert

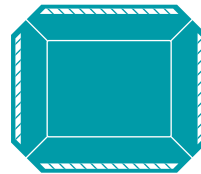

Starting on one side, fold the top Velcro flap on the Cover so it attaches to the hidden Velcro strip below the lip. Make sure the Velcro is completely under the edge. Keeping the corners aligned, repeat for all sides of the Storage Seat Frame.

## 3 Finish attaching Cover to Insert

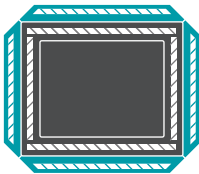

Turn Storage Seat Frame over and pull on each corner to make the top tight. Align Velcro on the Cover with the Velcro on the Storage Seat Frame. Don't push any Velcro all the way down until you have all 4 sides aligned straight.

## 4 Lay Lid Cover flat

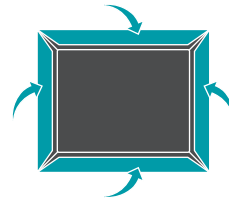

Lay Storage Lid Cover flat with Velcro facing up.

## 5 Lay Storage Lid on Cover

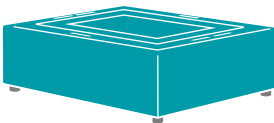

Lay Storage Lid on Storage Lid Cover with Velcro facing up.

## 6 Attach Cover to Lid

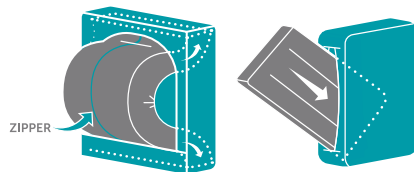

Pull each corner of the Cover over each corner of the Storage Lid and then Velcro all four sides of the Cover to the Storage Lid.

## 7 Set Storage Lid in Storage Seat Frame

With Velcro facing down, place your covered Storage Lid in your Covered Storage Seat Frame and add your new Storage Seat to your Sactionals setup.

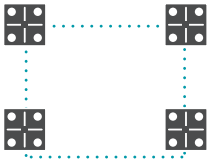

## 8 Cover Seat Cushion and Back Pillow

Insert one side of your Cushion into the Cover, and then bend it in half to get the other side to pop in. Insert the Back Pillow into the Back Pillow Cover. Make sure that your labels are at the bottom of the Cover.

# SETTING UP YOUR SACTIONALS

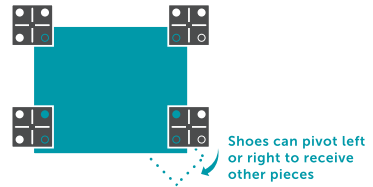

## 1 Lay down Shoes

**!** Make sure you place the Shoes face up so that you can see the alignment marks.

Every Sactionals configuration starts with four Shoes. Start building in the middle of your room and build out from there. Visit [lovesac.com](http://lovesac.com) for configuration inspiration.

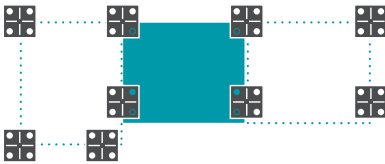

## 2 Place Seat Frame

**PRO TIP** Make sure that you leave the Shoes sticking out where you need to connect other Seats or Sides.

Place your Seat Frame on top of the 4 Shoes, inserting the Feet on the Frame into the holes in the Shoes. Adjust the Shoes so they are straight and square with the alignment marks to make adding pieces easier.

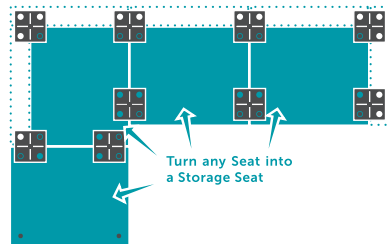

## 3 Continue to lay out Shoes

**PRO TIP** You can turn a Seat 90° to turn corners, make a deeper seat, or to add a chaise seat to your configuration.

Lay out more Shoes on either side of your first Seat Frame and align them as close as you can to the right spot. Notice how we set up the left side in a deep position.

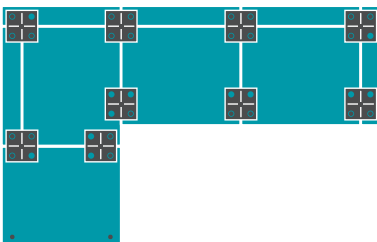

## 4 Add more Seat Frames

**PRO TIP** Do not insert any clamps until you have all Seats and Sides arranged.

Place two more Seat Frames on the Shoes that are exposed. Again, adjust the Shoes so they are straight and square with the alignment marks. Notice that this configuration will not require Shoes at the end of the chaise ottoman.

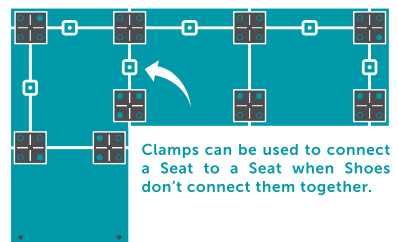

## 5 Add Sides

**PRO TIP** When placing the Sides, make sure Shoes are nice and square with the Seats and insert Side at an angle.

Once you have all of the Seat Frames in place you can add the Sides.

## 6 Clamp Together

**PRO TIP** Place the Storage Lid on the Storage Seat Frame after the Clamps are installed.

Use the steel Clamp to attach all Sides to the Seat Frames to complete our patented system.
