

Entangled Earth

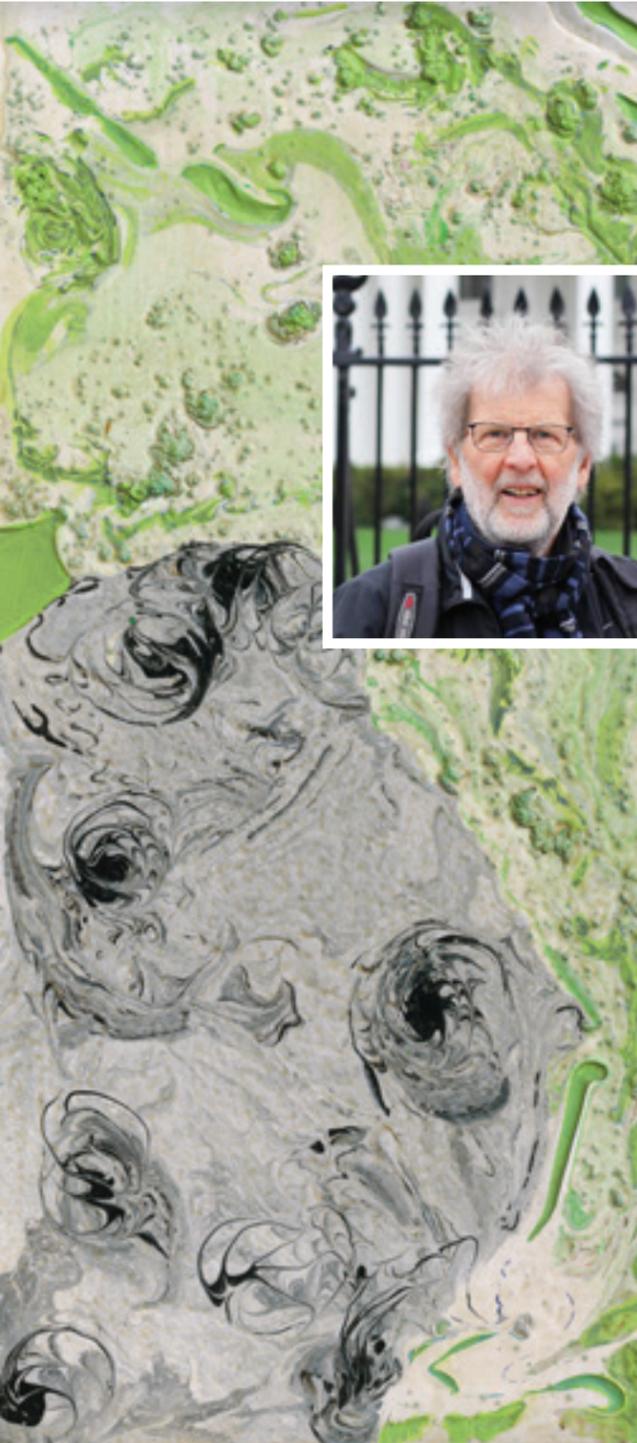

Entangled Earth is a testament to the unseen wonders of our world. Mycelium may be invisible to the human eye, but it's undeniably essential for our delicate ecosystem. Its hidden harmony and beauty have long eluded capture—until now.

Designed by Yelena Rodina, the Entangled Earth collection is a connecting bridge between the artistry of design and the allure of the grown world. Informed by mycelium, which are living networks of fungi and root systems of mushrooms on the forest floor, this “wood wide web” invisibly links natural worlds together through branching and fusing.

Han Huisman

Meet the Artist

"Art is like science, always on the move and prone to new developments."

Han is a driven artist and former scientist who puts his all into his work. As he says, "It's all or nothing." Born in The Netherlands, he came to the United States in 2005 to continue his career in neuroscience. Han was born deaf on both ears. Between the age of 5-10 he was operated numerous times and got some hearing ability to his right ear back. During his stay in the USA, he continued his hobby of creating and dreamt of one day pursuing his dream to be an artist full time.

Han's scientific career greatly influenced and led to his artistic career. He explains, "I worked as a scientist my whole life. As a scientist you follow the reaction patterns in your head and try to visualize them. In art I do the same. I have the 'final result' in my head and can follow the individual steps to the end product."

We commissioned an artwork inspired by Entangled Earth from Han Huisman, an artist with ArtLifting, as part of our Better Together™ initiative.

Each time you specify from collections in our ArtLifting partnership, we're donating to Susan G. Komen through our Specify for a Cure program. Join us in leveraging the power of art to bring people together and uplift our communities.
