Inspired by Durkan

Durkan's Inspired series is a set of common creel and colorspace guestroom patterns that respond to micro-trends. Our design team has honed a unique set of skills that respond and bring life to the micro-trends they are seeing in the hospitality industry.

This micro collection reimagines the relationship between technology and hand-crafted goods, moving beyond opposition toward a further symbiotic coexistence. It frames technology as a tool for working with natural systems rather than against them. By combining organic design principles with adaptive technologies and 3D-printed materials, the collection explores how responsive structures, and crafted forms can be created with both precision and harmony. The result is creating innovations that enable spaces to evolve with their environments, enhancing resilience and performance.
