The Design Vision

For this project, the client sought a flooring solution that combined beauty, durability, and sustainability. The goal was a seamless carpet solution with multiple styles flowing together to create a cohesive visual experience throughout the workplace. The client valued a long-term ROI, selecting premium, pattern-perfect carpet tiles for lasting performance and design impact. As a company committed to long-term value, they also prioritized products made in the USA, with sustainable materials and lasting durability.

Challenges

- Achieve a visually seamless installation across multiple spaces.
- Maintain strict sustainability and wellness standards.
- Deliver premium quality and durability to justify long-term investment.
- Meet a tight installation timeline to ensure project completion on schedule.

The Solutions

Red List Free | Made in the USA | Beyond Carbon Neutral +5%

Urban Fringe II and Chromatic Cadence were selected for their pattern precision, color harmony, and smooth design transitions. Both collections are built for long-term use—they're easy to install, durable against stains, and help improve noise control. They also give back through Specify for a Cure, our donation program supporting Susan G. Komen's breast cancer research.

Results Delivered

- A seamless, cohesive workplace enhanced with multiple carpet styles
- Sustainability goals exceeded, with Red List-free and carbon-neutral materials
- Acoustically optimized spaces that improve employee experience
- Client satisfaction high due to responsive service, turnkey support, and timely project completion

Additional Mohawk Support

Recover® | M1-X | Visualization Renders | Expedited Execution

With a required July start date, the project demanded agility and coordination. Through Mohawk Group's M1-X turnkey service, the client received white-glove project management—from blueprint support and budget alignment, to visualization services and installation renderings. When supply timelines tightened, Mohawk Group's procurement and logistics teams expedited shipments from running line inventory, ensuring an on-time delivery and installation. Additionally, Mohawk Group's ReCover® take-back program diverted 13,281 sq. ft. of the client's previous flooring from landfills through responsible recycling.

Sustainability

OUT OF WATERWAYS

314,104 Bottles

This project diverts the equivalent of this many plastic bottles out of landfills and into the circular economy.

IN A HOUSEHOLD

11 Households

We are restoring the freshwater equivalent of this many average American Households' daily water use.

IN THE FOREST

3.1 Acres

The net positive carbon impact of this project is equivalent to the amount of carbon sequestered by this many acres of trees in one year.

OFF THE ROAD

7,809 Miles

The net positive carbon impact of this project is equivalent to this many miles driven by an average gasoline-powered passenger vehicle.

Certifications

100% carbon neutral plus an additional 5% credible offset
