

Global Capabilities

Leadership on a Global Scale

Mohawk Industries stands as the world's largest flooring manufacturer and distributor, and Mohawk Group is its esteemed commercial division. As a global leader, we boast the unparalleled capability to offer the most extensive selection of flooring in the industry. Our vertically integrated manufacturing and distribution processes ensure superior quality, service, and value in the production of carpet, rugs, ceramic tile, wood, laminate, stone, and resilient flooring. With Mohawk Family of Brands, you can trust that you'll receive the flooring you need, exactly when and where you need it.

Design Services

At Mohawk Group, we provide premier design support on a global scale. We offer advanced tools and personalized services to bring your vision to life.

- **Custom Design Solutions**
Designs crafted to reflect your brand identity and project goals.
- **VIS & Patternworks Studio**
Precision tools for custom pattern development, scale adjustment, and seamless layout integration.
- **Visualization & Simulation Services**
High-end renderings and interactive simulations to preview and refine your space before installation.
- **Personal Studio**
A private, client-dedicated platform for reviewing samples, color palettes, and exclusive design options.
- **Fly Through Experiences**
Immersive, 3D walk-throughs that offer a virtual tour of your project, enhancing stakeholder alignment and decision-making.

Duracolor® Tricolor solution dyed nylon delivers unsurpassed stain resistance, colorfastness, durability, color clarity, and enhanced soil performance.

SOIL CONTROL

Optimal soil hiding, soil removal, and color clarity, due to its unique shape and triangular hollow core.

STAIN RESISTANCE

Utilizes a patented process for permanent built-in stain resistance that won't wash or wear off.

PERFORMANCE

Unsurpassed colorfastness to light and atmospheric contaminants, so colors won't fade.

DURABILITY

Unique fiber shape and core resist crushing, for carpet with enhanced durability and a longer life cycle.

SUSTAINABILITY

Declare Red List Free and made with a minimum of 72% recycled content.

EcoFlex® ONE

ALL-IN-ONE FLOORING SOLUTION

Every element in the EcoFlex® ONE construction has purpose, and combined they form the industry's leading modular carpet solution. The hydrophobic PET cushion, backing layers, and Duracolor® Tricolor fiber are engineered with your end-goals in mind: to optimize your investment, be sustainably made, and provide a better occupant experience.

KEY FEATURES

- Better Acoustics
- Enhanced Comfort & Safety
- Worry-Free Installation
- Simplified Maintenance
- NSF 140 Platinum
- Carbon Neutral +5%
- Limited Lifetime Warranty

EcoFlex® ONE is a unified solution to the wide range of needs in your spaces. This advanced backing system improves every aspect of comfort and acoustics while eliminating moisture testing—all with a lighter environmental footprint that is carbon neutral plus an additional 5% offset. Tested and proven, EcoFlex® ONE is the holistic solution for human-centric environments.

EcoFlex® AIR CARPET TILE BACKING WITH ATTACHED CUSHION

The next evolution in cushion backed carpet tile, EcoFlex® AIR offers substantial moisture management, sound reduction and enhanced comfort under foot. It also incorporates an average of 50% recycled content (pre- and post-consumer) by total product weight. Additionally, in most cases no moisture testing is required prior to installation.**

PERFORMANCE

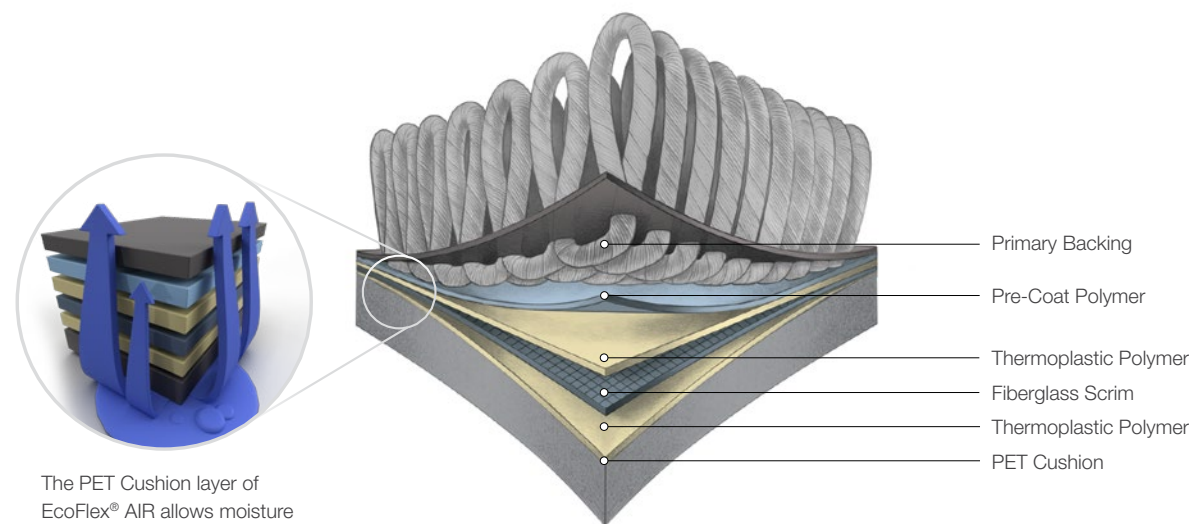

- Tiles are impervious to moisture damage from spills and water extraction cleaning
- Allows subfloor moisture vapor to flow through the backing and escape from the seams**
- Provides permanent tile dimensional stability
- Noise Reduction Coefficient = 0.25; carpet tiles absorb 25% of ambient sound
- Impact Insulation Class—up to 73
- Performs up to 2x better reducing sound transmission than hard surfaces
- Construction features superior tuft bind that is highly resistant to edge ravel
- Reduces the risk of severe injury in the event of a slip or fall

SUSTAINABILITY

- Total 58% recycled content by finished product weight: 45% pre-consumer and 13% post-consumer recycled content
- PET Cushion layer of EcoFlex® AIR contains a minimum of 90% post-consumer recycled content.
- Certified NSF/ANSI 140 Platinum with a minimum of 13% post-consumer recycled content.
- EcoFlex® AIR may contribute to LEED v4, Living Building Challenge, and the WELL Building Standard
- Contains no plasticizers
- Red List Free

SERVICE

- Available as an option on all Mohawk Group carpet tiles, minimum square meter quantities may be required.
- Contact your sales representative for more information.

The PET Cushion layer of EcoFlex® AIR allows moisture to safely escape through the seams of the tile.

* Recycled content claim third party verified by UL (Underwriters Laboratory)
** Please consult Mohawk Group Installation Instructions for more details

ColorStrand® FIBER

For over 15 years, ColorStrand® fiber has continually exceeded the demanding expectations of our customers for their projects. With the design flexibility and color intensity of solution dyed fiber, ColorStrand® delivers lasting beauty and value. And, ColorStrand® has the added benefit of third party SCS Global Services certified 30% recycled content.

PERFORMANCE

- Unsurpassed colorfastness to light, atmospheric contaminants, and harsh cleaning agents in ColorStrand® SD
- EcoSentry Plus Soil® and Stain Protector keeps your investment looking newer longer
- Can be engineered to achieve the most severe TARR rating

BUDGET

- Internally extruded fiber allows cost control of products
- Numerous broadloom and modular products available at value engineered budgets

DESIGN

- A wide variety of colors for excellent design flexibility

SUSTAINABILITY

- ColorStrand® contains a minimum of 30% pre-consumer recycled content by total weight*
- Mohawk Group products tufted with ColorStrand® are CRI Green Label Plus® certified for VOC emissions
- Recyclable through Mohawk Group's ReCover Program

SERVICE

- Quickship styles available within 10 days providing what you need when you need it
- 100% vertically integrated providing unsurpassed lead times and service reliability

*Recycled content claim third party verified by SCS Global Services

Wild Horizons

Wild Horizons embodies the essence of Ungardening, the rewilding practice of allowing wildflowers to grow uninhibited instead of in a controlled garden, fostering a connection to the wild while promoting sustainability and biophilic design.

Substratum

The substratum of the natural world encompasses elements like soil, rock, and minerals that create the earth's foundation. The Substratum collection was inspired by the intricate interplay of plants, roots, and the earth that sustains them. The floor is a crucial foundation for your space, just as nature's substratum is crucial to the flourishing of all life on earth.

Substratum: Natural Networks & Base Layer

[EXPLORE THE COLLECTION BROCHURE](#)

Pathmakers

With Pathmakers, we drew inspiration from bees, whose paths of pollination help sustain all life. Influenced by hive structures and the daily journeys of bees, Pathmakers carpet planks are designed to support multifaceted communities, utilizing materials and methods that do more to care for our planet.

Smart City Collection

Explore Smart City, where transit systems provide human mobility and connectivity. The linear graphics of Urban Mobility are inspired by actual subway lines in Berlin, Istanbul, London, New York, Paris and Shanghai, while the organic base pattern of Urban Model reflects the texture and rhythm of a metropolitan mapscape.

[EXPLORE THE COLLECTION BROCHURE](#)

Lichen Community Collection

The multi-hued, multi-textured lichens that thrive on bark and rock formations once again inspire us in Lichen Community collection. The refined Micro Bloom and Macro Bloom palette includes warm and cool background textures with more neutral and tonal accent colors, which can help to define communal spaces and create unique large-scale installations.

Lichen Community embodies Mohawk Group's commitment to dematerialization and a more restorative, carbon neutral future. Leveraging our Pattern Perfect technology, the Lichen Community Collection is beyond carbon neutral. Boasting an additional 5% carbon offset for a net-positive impact, we continue our legacy of innovative products and technologies that will lead us to Net Zero carbon emissions by 2040.

Shape Theory Collection

Welcome to a world where lines, angles, and curves converge to redefine interior spaces—and shape a more resilient, creative culture. Introducing Shape Theory, a collection that breathes optimism and collaboration into environments through the harmonious play of geometric shapes and bold colors.

Inspired by the elegant simplicity of geometry and the invigorating power of vibrant hues, Shape Theory is crafted to stimulate the senses, encourage new perspectives and invite people to engage with each other.

Discover the power of shape and color to create an engaged, supportive culture.

Timeless Tailored Collection

Mirroring the classic tweed, twill and detailing of pant suits, our Timeless Tailored collection of modular carpet tile brings an air of sophistication to your floor. With subtle movement, texture and dimension, three styles in eight colorways can be used in tandem to create versatile spaces that stand the test of time.

[EXPLORE THE COLLECTION BROCHURE](#)

Reconnect 2.0 Collection

Reconnect 2.0 collection by Mohawk Group allows designers creative freedom in open space environments by using high contrast vivid color gradation and transitional textures that work together to create street smart design for any interior. A tri-transitional texture in seven accent colorways is inspired by the work of leading street artists' unique eye for fusion spaces. Also available in custom colorations, Reconnect 2.0 allows your design sensibilities to roam for endless creativity.

Neurodiversity, Naturally Supported

Jackie Dettmar, Vice President of Design and Marketing, Mohawk Group

Anastasija Lesjak, Martin Lesjak, CEO and Creative Director, 13 & 9 Design

Mohawk Group integrates neurodiversity into flooring design via fractal patterns developed by 13&9 Design and Dr. Richard Taylor of Fractals Research. By applying D values—a measure of fractal complexity— we shape how spaces affect people physically and cognitively. Mid-range D values in fractal patterns (around 1.5) have been shown to reduce stress by up to 60%, lowering blood pressure and breathing rate. Our fractal designs feature a range of mid-D values to support diverse environments and needs.

Lower D values create a more calming, restorative effect—ideal for focus zones, wellness rooms, or employee break areas.

Higher D values offer increased visual stimulation, making them a strong fit for retail environments and collaborative workspaces where engagement is key.

Fractal Findings

Fractals are repeatable patterns that occur throughout our natural world. Scientists have found that we are fluent at perceiving fractals in nature and receiving their benefits. Building on our collaboration with 13&9 Design and Dr. Richard Taylor of Fractals Research, Fractal Findings carpet tile collection expands Mohawk Group's collections of fractal-based patterns that support well-being and are scientifically proven to reduce stress in all types of spaces.

Fractal Findings: exploreD & discoverD

[EXPLORE THE COLLECTION BROCHURE](#)

Relaxing Floors Collection

Fractals are the building block of many of nature's patterns and have been scientifically proven to reduce stress and so provide benefits to physical health. This visual language is the basis for Relaxing Floors.

[EXPLORE THE COLLECTION BROCHURE](#)

Fractal Fluency Collection

13&9 Design, Mohawk Group, and Dr. Richard Taylor of the University of Oregon and Fractals Research developed the Fractal Fluency Collection, delivering a geometric abstraction of natural fractal environments, such as tree branches and stone landscapes.

The design concept is based on the “fractal fluency” model, which declares that human vision has become fluent in the visual language of nature’s fractals and can process their features efficiently, creating an aesthetic experience accompanied by a decrease in the observer’s physiological stress-levels.

The two styles selected from the recently established Fractal Library resemble natural scenes that display fractal composites, consisting of individual geometric arrangements that visually merge to form the overall fractal pattern. The aim is to tap into our innate affinity for natural patterns, helping to create more relaxing surroundings.

Creative Spark Collection

In the kaleidoscope of human experience, color is one of the most powerful tools we have to express individuality. Colors evoke emotions and symbolize the rich tapestry of perspectives within a community. With Creative Spark carpet tile, you have the power of color at your fingertips.

Bring new facets of experience and emotion into your spaces with Creative Spark's inspired palette of 32 colors. Every hue helps you tell a new story, and each one coordinates across our product collections—empowering you to get creative and play!

Through the inspired use of color in your designs, you can help shape a rich, diverse culture in your spaces—a culture of care, where each individual is seen and celebrated. A culture that sparks a sense of belonging—and ignites the power of collaboration and innovation.

[EXPLORE THE COLLECTION BROCHURE](#)

Painted Perspectives Collection

As part of Mohawk Group's Better Together Initiative, the Painted Perspectives commercial broadloom collection merges diverse artistic styles to celebrate the beauty of shared visual arts. Inspired by the art of Alicia Sterling Beach and Scott Benner from the ArtLifting community, this soft surface collection embodies collaborative work.

CASE STUDY

Large Financial Institute

CHINA

CHALLENGE

A renowned financial company seeks to design an office space that embodies the sophistication and precision of the financial industry while also reducing employee work stress.

SOLUTION

The Relaxing Floor collection combines fractal design and natural patterns to create a refined, stress-reducing workspace that enhances both aesthetics and functionality. The carpet tile uses Mohawk Group's ColorStrand® and Duracolor® yarns, offering a flooring solution that prioritizes comfort, durability, and sustainability. These innovative yarns meet low-carbon standards while providing superior stain resistance and a soft underfoot feel, ensuring a healthy and safe work environment.

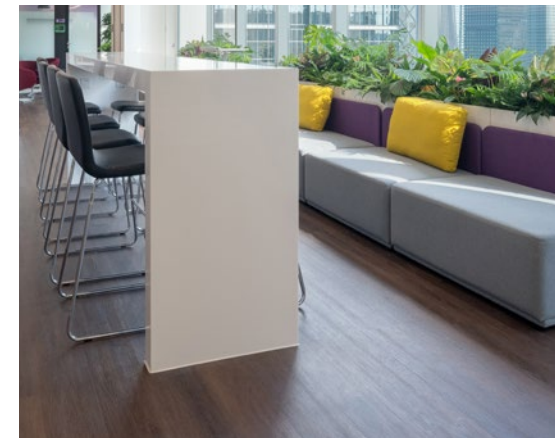

PRODUCTS: Relaxing Floors & Nutopia 2.0

CASE STUDY

Consulting Firm

CHINA

CHALLENGE

The client, a consulting firm, wanted a workspace that combined precision and minimalism with vibrant elements, resulting in a professional yet energizing environment.

SOLUTION

To achieve this balance, the design combines traditional carpet with modern vinyl flooring, merging functionality with a refined aesthetic. This thoughtful blend ensures the space remains practical while embodying contemporary sophistication. The result is a workspace that harmonizes precision, minimalism, and vitality—creating an environment that is both functional and inspiring for this forward-thinking consulting firm.

PRODUCTS: Select Step II Stone, Grainiac, Substratum, Shape Theory

CASE STUDY

Global Electric Company

CHINA

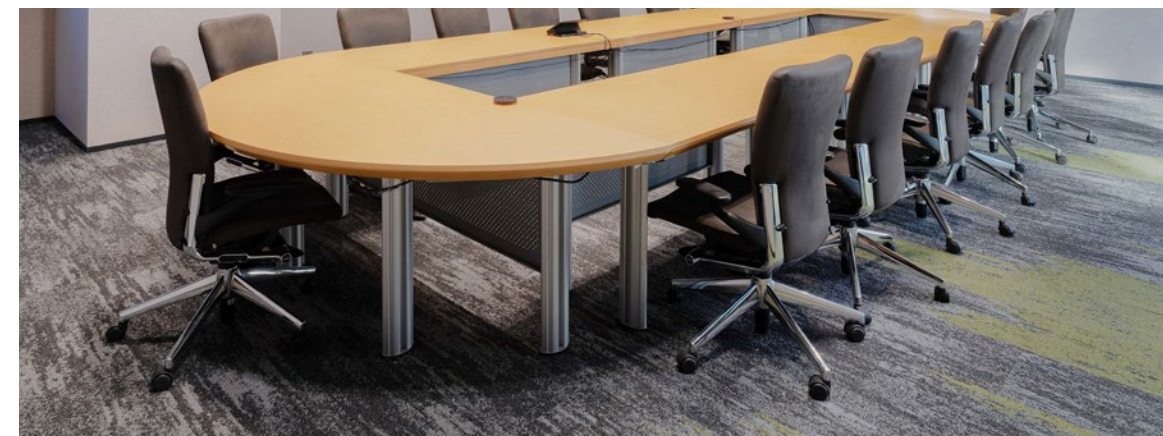

CHALLENGE

As a globally renowned electrical appliance company, they are in need of exceptional flooring performance and stringent health standards—setting a high bar for both durability and well-being.

SOLUTION

By incorporating Mohawk Groups ColorStrand® and Duracolor® yarns, we provided a solution that met the customer's high standards for comfort, environmental sustainability, and durability. The Ecoflex cushion back ensured a healthy, comfortable, and safe working environment for employees, while enhancing the overall quality of the space. The recycled PET felt backing thermally insulates the occupied space to moderate HVAC fluctuation and therefore reduce power consumption by as much as 20%, offsetting the carbon footprint to reduce carbon credit liability.
