

Flooring Recommendations Guide

MEDELLA WELL, WITH M-FORCE® XTREME TECHNOLOGY

HOMOGENEOUS SHEET

Our recommended applications guide can help users to identify the best ways to use their products in different spaces. Utilize this guide along with consulting your Mohawk Group Account Executive to help navigate product specification and install the right floor for the right types of environments, spaces, and buildings.

Showers / Shower Rooms	

IN ADDITION TO SPACES LISTED ON THESE CHARTS:

Commercial Products from Mohawk Group may be used on stair steps, risers and landings. A manufactured slip-retardant nosing should always be applied on steps. Most commercial sheet floors can be flash coved (integral cove). Most building codes consider flash coving in the same category as baseboard trim with respect to fire rating. Consult applicable codes for the particular project to determine the interpretation of allowable height for flash cove; commercial products from Mohawk Group are not recommended for exterior use, for interior spaces where pointed spike golf or track shoes will be used, or in areas where the floor will be subjected to unusually concentrated static or dynamic loads; commercial products from Mohawk Group should not be used as wall covering or wall surfacing.

1. In most cases veterinary applications are similar.
2. Only operating rooms not requiring conductive flooring.
3. Mohawk Group flooring is not recommended for commercial kitchens and commercial food processing areas, including behind fast-food counters.
4. Most Mohawk Group floors are not recommended for heavy industrial areas.
5. No standing water; walk-off mats required.
6. Not recommended in laboratories that require special decontamination procedures on surfaces, including floors.
7. Only homogeneous products are recommended in low temperature environmental conditioning units NOT below 14 F.
8. Slip Resistance - A more secure walking surface is required for ramps greater than 19 degrees.
9. Not recommended in applications that require electrostatic discharge control.
10. Not recommended in areas where free weights are used.
11. Aseptic Area - Hygiene conditions are of critical importance
