

# Advanced Solutions for High Moisture in Concrete Slabs

MODULAR CARPET | BROADLOOM | LVT | HOMOGENEOUS RESILIENT TILE

**Cost-effective**

**No special and time-consuming floor preparation measures**

**Long-term performance**

Excessive moisture levels in concrete are a pervasive, costly and time-consuming problem that can lead to flooring failure, microbial growth and odors. Estimates indicate that up to \$2.4 billion is spent annually in the U.S. on correcting moisture-related issues with concrete slabs.

Fortunately, Mohawk Group offers a portfolio of flooring and adhesives that eliminates the need for expensive mitigation products and procedures, and can save contractors and owners time and money.

# Mohawk Group Product Solutions for High Moisture

	Product Type	Approved Adhesives	pH Limit	Moisture Tolerance
MODULAR CARPET	EcoFlex® ONE/EcoFlex® AIR	EnPress, FlexLok+, M700 Plus, SimplySpray	<12	99%*
		Total Bond	<12	100%*
	EcoFlex® Matrix/EcoFlex® Matrix ULC	EnPress	<12	95%
		M700 Plus	5–10	95%
		FlexLok+	<12	99%*
		Total Bond	<12	100%*
BROADLOOM	Unibond Plus Unibond Plus ComfortGuard WeldLok WeldLok ComfortGuard	NuBroadlok VRT	<12	99%*
LVT		FlexPress	<12	99%*
		M700 Plus	5–10	95%
		Total Bond	<12	100%*
	PVC Free Resilient Tile & Planks	FlexPress	<12	99%*
	Homogeneous Resilient Tile	Total Bond	<12	100%*

\*No moisture testing is required
