

Pathmakers Textures

Gentle Ground Buzzing Trails

Pathmakers Textures

By looking deeply into the world around us, we discover nature's systems of care—how each part of an ecosystem is connected and helps to sustain the whole. Even the tiny bee is integral, its daily paths of pollination generating new plants, in turn helping to sustain all life.

With bees as inspiration, we created the Pathmakers carpet plank collection. The textural styles in this book, Gentle Ground and Buzzing Trails, feature subtle visuals evoking fields criss-crossed by paths of pollinating bees. Paired with Pathmakers Patterns or used individually, the collection's styles support multifaceted communities, utilizing materials and methods that do more to care for our planet.

With Pathmakers, we begin to grow a culture of care between people, place, and the natural world—as we learn to create the vital paths of connection that can sustain us all.
