Textorial

Biophilic Luxury Carpet Tile

Experience an Authentic Journey for the Senses

Textorial is a distinctive carpet tile collection that imparts luxury to commercial spaces. Crafted from solution dyed nylon, Textorial boasts an authentic wool-like look and feel, combining the natural beauty of wool with the high-performance benefits of Mohawk Group's innovative nylon yarns.

Inspired by the transformation of raw wool into fiber, Textorial features two styles—Carded and Plied—that honor the various stages of wool fiber production, evoking a deep sense of tactility and sensory appeal.

With its plush textures and ounce weights, Textorial creates cozy spaces that invite emotional connections and creature comforts. Made with Mohawk Group's Duracolor® fiber and EcoFlex™ One backing, Textorial offers outstanding performance and is exclusively available through Mohawk Group's Custom Collections for a minimum order of 250 yards.

Carded

The inspiration for Carded starts with “carding”, where wool fibers are untangled and aligned in one direction, preparing it to be spun into a wool yarn for textiles. The subtle cross-hatching in the Carded style references this process, showing layers of warmth as it forms a gentle, open structure across the floor. This wool-looking texture has been recreated in Mohawk Group’s Duracolor® solution dyed fiber for high performance.

12” x 36” Carpet Plank | 4 Colorways

Carded, 738 Merino
Vertical Ashlar Installation

Plied

The inspiration for Plied starts with “plying”, where two or more single strands of fiber get twisted together to create a stronger yarn. The Plied style builds a comforting sense of linear movement, softened by nubby, organic dimension. This wool-looking texture has been recreated in Mohawk Group’s Duracolor® solution dyed fiber for high performance.

Natural Hues

Wool colors can vary significantly, with shades ranging from creamy whites to rich browns and black. Each sheep, goat and related breeds provides distinguishable wool colors—often reflecting the environmental adaptations and heritage of the breed. These natural hues are prized for their ability to create earthy, organic textiles with a luxurious depth and nuance.

While the fiber for the Textorial collection is made from solution dyed nylon for high performance in commercial spaces, the four colorways shared across the two styles offer a biomimetic look of wool, using natural animal fiber colors from the Heathered Hues yarn bank. Heathered yarns offer a contrast within each color that looks and feels like authentic wool.
