## Biophilic Design

Thrive at Montvale Assisted Living and Memory Care was conceived before COVID, built during the pandemic, and now welcomes residents, families, and guests. Thrive Senior Living partnered with StudioSIX5 to design a space that promotes connection, well-being, and comfort.

### Dining as a Social Hub

The dining area, branded as The Saltbox, is central to the community located near the entrance and social areas. Its design reflects a modern greenhouse, inspired by New Jersey's identity as "The Garden State." Biophilic elements, including the Mohawk Lichen Collection flooring, create a natural, inviting atmosphere.

### Design Inspiration and Functionality

StudioSIX5 selected the Lichen Collection for its nature-inspired patterns and hospitality feel, avoiding traditional hard surface looks. The collection's Groundcover, Macro Bloom, and Micro Bloom designs provide a visually engaging but non-distracting pattern. The flooring harmonizes with the space's decorative trusses, large windows, stone walls, and pendant lighting.

# Case Study

## Performance and Sustainability

The Lichen Collection's Duracolor Tricor fiber ensures stain resistance and durability, essential for senior living. The zero-height transitions support mobility, especially for residents using walkers or scooters. Though environmental certification wasn't required, the flooring's sustainable attributes align with the project's ethos.

## Seamless Installation

Mohawk Group provided clear installation drawings, making the process smooth and accurate on the first attempt. To assist with a successful installation, Mohawk Group offered this value-added service at no cost to the client.

## About Mohawk Group

As the world's leading producer and distributor of quality commercial flooring, Mohawk Group believes that better floor coverings emerge from better design, innovation, and sustainable practices. Mohawk Group addresses the unique challenges and opportunities for Senior Living communities with a comprehensive portfolio of high-quality, sustainable flooring of all types and price points. As the commercial division of Mohawk Industries, the company has a heritage of craftsmanship that spans more than 140 years.
