Tinted Timber

Deep Tint Whisper Grain

Tinted Timber

Color has the power to transform a space, shaping energy, guiding flow, and sparking emotion. Tinted Timber is designed to make that power easy to use.

The collection features two styles that explore color in clean oak visuals: Deep Tint emphasizes a spectrum of complementary hues, while Whisper Grain introduces light touches of color. The shades work together in a natural progression, allowing layouts to move easily from subtle to saturated within a single color family.

Designed to perform beautifully in high-traffic areas, Tinted Timber opens new possibilities for wayfinding, zoning, or simply shaping atmosphere, all while maintaining a cohesive look. The collection offers a streamlined way to bring clarity, flow, and creative expression to any space.

Deep Tint & Whisper Grain COLORWAYS

The Tinted Timber palette is built around a simple yet versatile system. Each color story begins with Whisper Grain, where subtle wisps of color soften the clean oak grain. To accompany each Whisper Grain colorway, there are two Deep Tint companions: one brighter and one darker, offering saturated expressions of the same hue.

This trio structure—light, bright, and deep—provides design flexibility. Mix the color trio within a space to create gradients, zones, or intuitive pathways. Move seamlessly from calm understatement to vivid contrast, all within a cohesive visual language.
