

HASSLE-FREE FLOORING

UltimateFlex is a versatile, durable and 100% waterproof luxury vinyl tile and plank flooring. Perfect for damp areas like kitchens and baths, high traffic areas and multi-level living, the glue-down flooring installs easily and allows for replacement of individual planks, saving time and money. UltimateFlex goes down fast and stays down longer for truly hassle-free flooring.

100% Waterproof

Dimensionally stable and 100% waterproof, UltimateFlex luxury vinyl flooring withstands everyday splashes and spills, making it the ideal flooring for all areas on any level, including kitchens and baths.

Easy to Maintain

The construction and glue down installation of UltimateFlex offers higher performance for less rework and increased flooring life. The durable planks and tiles resist separation due to heavy rolling loads or high foot traffic, while also featuring EasyClean® stain protection, for flooring that looks newer, longer.

Easy to Repair

Features glue-down installation rather than locking together, making it easy and inexpensive to replace individual planks and extend the life of the floor.
