Entangled Earth D98996

Uplifting Others 12CMAB89

Abstract Artistry QTF90986

Definity carpet is the new standard in sustainable luxury — surpassing traditional luxury carpet with incredible multilevel textures, more than twice the definition, superior performance and unmatched sustainability.

Beyond Carbon Neutral

Not only is Definity 100% carbon neutral, but it also provides an additional 5% carbon offset. Colorstrand fiber in Definity outclasses wool fiber in every category of sustainability, including embodied carbon emissions, water consumption and non-renewable energy use.

Beyond Axminster

Made with Colorstrand® Solution Dyed Nylon to provide greater durability and colorfastness than the 80/20 blend of wool and nylon in the typical Axminster product.

Beyond Imagination

Definity is the ultimate union of convenience and luxury. It is crafted to endure in every application, while offering greater value, sustainability benefits and life cycle solutions compared to other high-end hospitality carpet.

Rheo Morph

PDI (Precision Dye Injection) / Synthesis

The patented Synthesis process layers pattern and texture to provide unprecedented 3D image quality and clarity. The result is a unique layering effect that brings tremendous depth and richness to carpet design. Designers can use up to 12 colors in a standard palette layered over a choice of several standard texture base grades with additional customization available.

Pattern Perfect

Feel the difference with our proprietary Pattern Perfect technology. Bring elevated texture, depth, warmth and tactility to any contract interior. Offered in broadloom and tile formats, Pattern Perfect offers the ultimate design freedom.

CYP

Our CYP products provide textures and patterning in any scale with cut and loop construction. You can leverage our 6 colors to create a wider spectrum of up to 12 tones and shades for your design.

Tufted Broadloom

Tufted broadloom can incorporate multi-color designs to perfectly compliment the other interior spaces in a project.

Carpet Tile and Plank

Carpet tile offers a state-of-the-art approach to installation as well as the added wear and maintenance advantages of modular flooring. EcoFlex Air backed carpet tiles boast substantial moisture management, sound reduction, and enhanced comfort underfoot. The EcoFlex Air backing requires no transition strips when used with 4.5mm thick LVT planks, creating a seamless installation.

Luxury Vinyl Tile (LVT)

Today's luxury vinyl features some of the most innovative, versatile, and high-performing flooring available. Premium vinyl flooring offers the richness and texture of more expensive natural materials, such as hardwood, ceramic tile, and stone, without maxing out your budget. LVT make installing these quality surfaces even easier.

RevWood Contract

Our improved waterproof laminated wood flooring solution features the most realistic wood visuals with emboss in register technology, an attached pad for premium sound absorption, a waterproof click system, and maximum scratch and wear resistance.

Homogeneous Vinyl Tile (HVT)

Homogeneous Vinyl Tile is an exceptionally tough, long-lasting and beautiful floor that will perform in the most extreme conditions. With no lamination or wear layer, the 100% homogenous construction from top to bottom allows this product to be buffed as needed, ensuring your floor looks better longer.

Resilient Sheet

Homogeneous resilient sheet with M-Force™ Ultra installs with welded seams, creating a wall-to-wall impermeable flooring solution that supports the most demanding public spaces with superior infection control and moisture resistance. The broad palette offers pops of color and soft neutrals in a contemporary terrazzo visual that is ideal for way-finding or branded spaces.

Seamless solutions.
Unrivalled experience.

Explore an array of products and technologies designed to meet the specific demands of every area within your convention center.
