Open Narrative

Many of the world's greatest stories are those with open narratives that leave the audience captivated and intrigued. The same is true of elements found within the realms of art and design, as these stories guide us on emotional journeys. Mohawk Group's Open Narrative is based on this same premise. The carpet collection includes a wide variety of patterns and colors that help guide a rich experience for end users by telling stories that create a sense of place.

Featuring Mohawk Group's patented Synthesis PDI technology, designers have access to an expanded portfolio of cut and loop patterns with tremendous depth and richness. Crafting rich stories is easy with a low minimum order of 50 square yards, as designers can choose from some of our most popular traditional, contemporary, transitional and textural patterns to incorporate their own *open narrative.*
