FOR IMMEDIATE RELEASE

MOHAWK GROUP INTRODUCES ADDITIONAL HEALTHY ENVIRONMENTS RESILIENT SHEET STYLES

DALTON, Ga., December 16, 2022 — With a new range of styles and an expanded palette, the Healthy Environments collection now offers even more heterogeneous resilient sheet options than ever before. The collection is designed to help create spaces that comfort patients and their families. A soothing sense of natural forms and textures inspired by nature delivers the high performance and ease of cleaning that healthcare and senior living spaces require.

High-performing heterogeneous sheet product styles feature the M-Force™ combination finish layer, wear layer and design layer, providing the exceptional scratch, stain, and wear resistance required by healthcare and senior living interiors. This expanded line of beautiful flooring not only coordinates perfectly with other Mohawk Group LVT and carpet collections, it also performs at the highest levels.

“You need a floor that beautifully supports all the life in your facility. Life doesn’t stop where the industry testing standards stop. Foot traffic keeps walking, spills keep splashing, and heavy loads keep rolling,” states Elizabeth Bonner, design director for senior living and healthcare at Mohawk Group. “That’s why we continually test M-Force floors to perform beyond industry standards.”

The Healthy Environments collection is inspired by the alluring, soothing colors and textures of species native to the desert Southwest. In addition to their natural beauty, the innate hardiness of these plants provides a paradigm for perseverance through difficult challenges and environments. Five heterogeneous resilient styles include comforting wood plank visuals; textural designs evoking natural woven fibers; and a striated wood grain that strikes the perfect balance between organic and abstract. Drawing inspiration from biophilic design, the Healthy Environments collection was created to help advance healing and productivity in the health and wellness built environment.

Healthy Environments also reflects Mohawk Group’s commitment to sustainability. The product line is manufactured domestically in Dalton, Ga. Mohawk Group is taking its commitment to being better for people and the planet by taking its products Beyond Carbon Neutral, meaning they are 100% neutral plus an additional

5% for a net-positive impact on the environment. Additionally, all styles are FloorScore Certified.
