

## Color Pulse™

MULTI-COLOR SOLUTION DYED FIBER

Our new fiber breakthrough delivers the visual texture and dynamic dimension of a space dyed yarn, with the lower environmental impact and high performance of our solution dyed nylon.

Earth Pulse

### Earth Pulse:

Light to dark warm neutral tones that recall whitewater, sand and stone in tumbling rapids.

Sun Pulse

### Sun Pulse:

Vivid bright accents of orange, yellow, green and blue that highlight the variety of life and minerals in a shallow, sunlit riverbed.

Moon Pulse

### Moon Pulse:

A range of deep colors of gold, teal, and magenta inspired by the iridescence of water-covered river stones.

Water Pulse

### Water Pulse:

A mélange of light to dark cool blues drawn from the surface of a river, where light plays off the shallows and depths.

## ZERO Water

Color Pulse uses zero water in its dyeing process, conserving natural resources and helping us bring you Net Positive Water flooring products.

 **612,000**  
bottles of water

Or 76,500 gallons of water: the amount of water saved by replacing traditional space dyed yarns with our Color Pulse fibers. *(Based on our 2019 water consumption statistics.)*
