

## M-Force™ for Resilient Sheet

COMPLETE PERFORMANCE SYSTEM FOR HETEROGENOUS SHEET

Staff moving equipment, students dragging chairs, employees spilling coffee—for all the life that goes on in your space, your floors will be protected with M-Force: the complete performance system that makes your floor look better longer.

### Performance for Life.

You need a floor that beautifully supports all the life in your facility. And life doesn't stop where the industry testing standards stop. Foot traffic keeps walking, spills keep splashing, and heavy loads keep rolling. That's why we continually test M-Force floors to perform beyond the industry standards.

We work to exceed the standards because M-Force works to ensure your floor looks better longer for everything that happens in your space. M-Force means you get performance for life.

### Worry Free Functionality.

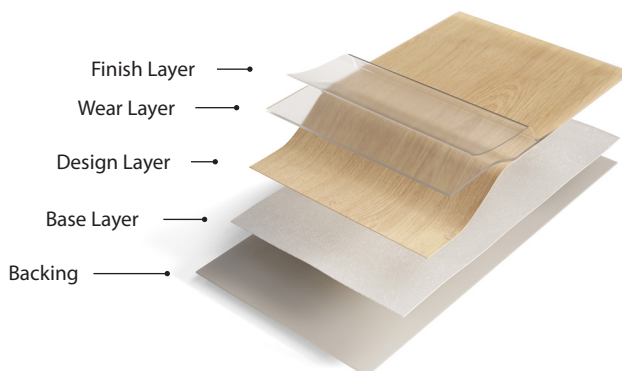

Because Mohawk Group's resilient sheet is impermeable, messes can't settle into the material which prevents lasting stains.

### The M-Force Warranty.

Resilient Sheet with M-Force carries a limited 10-year commercial warranty and a 10-year resilient underbed warranty.

### M-Force

A synergy of three layers built together into one high-performance flooring solution.

### Three-Part Protection

M-Force is a combination of the finish layer, wear layer, and design layer. We develop each layer individually for optimal performance and then we build the layers in a proprietary process that makes their performance exponentially greater together.

As a result, your floor looks better longer with superior protection against scratches, stains, and wear, all while providing a crisp, clear visual and easy maintenance.
