ADHESIVES & SUBFLOOR PREP  
FOR SUBFLOORS

UltraSmooth™  
Subfloor Leveling Agent

Performance Accessories UltraSmooth™ Leveler is a one-component, durable, and versatile cementitious underlayment for interior and exterior concrete and cementitious substrates. It can be applied manually or by pump to produce a self-smoothing, rapid-setting, and flat substrate prior to the application of a final floor finish. Typical application thickness is 1/8" up to 3" (3 mm up to 76 mm).

Sustainability for UltraSmooth™  
LEED v4 and v4.1 Compliant ✓

## ADHESIVES & SUBFLOOR PREP

### MULTIPURPOSE

## M700 Plus

### Pressure-Sensitive, Low-Odor Acrylic Multipurpose Adhesive

M700 Plus is a pressure-sensitive acrylic adhesive with high-strength, high-tack adhesion for LVT, sheet vinyl, and both PVC-backed and non-PVC-backed carpet tiles over porous and nonporous substrates. With fast dry time, extended open time, and low odor, it ensures easy application and strong moisture resistance for high-traffic environments like hospitals, schools, and offices..

## ADHESIVES & SUBFLOOR PREP FOR VINYL

### MS160

#### Spray Adhesive for Resilient Flooring

MS160 is a fast-drying, high-tack aerosol adhesive that provides quicker, easier installation than traditional adhesives. Its compact spray-can format allows for precise, low-mess application, making it ideal for quick-turn projects and occupied spaces. With moisture resistance up to 95% RH, its aggressive grab and shear strength ensure secure bonding in commercial environments..

### Silent Bond™

#### Sound-Dampening, Moisture-Resistant Wood Flooring Adhesive

Exclusive to Performance Accessories, Silent Bond™ is a one-component, hybrid polymer adhesive that also serves as a sound-dampening moisture vapor barrier, enhancing IIC ratings. It eliminates the need for preinstallation moisture testing for engineered wood and bridges static cracks, delivering superior adhesion with easy trowel application.

## ADHESIVES & SUBFLOOR PREP FOR CARPET

### NuBroadlok® Seam Sealer

#### Solvent-Free Carpet Seam Sealer

NuBroadlok® Solvent-Free Carpet Seam Sealer is recommended for seaming polypropylene, jute, urethane, latex unitary carpet and woven-backed and vinyl-backed edges. It prevents unraveling and/or delaminating of carpet backings and yarns. NuBroadlok Solvent Free Carpet Seam Sealer can be used for direct stick and conventional stretch-in installations and is resistant to mildew, fungus, and professional carpet cleaning.

## ADHESIVES & SUBFLOOR PREP FOR CARPET

### NuBroadlok®

#### Fast-Grabbing, High-Solids Carpet Adhesive

NuBroadlok® Premium Adhesive is a high-solids, commercial-grade adhesive designed for use with all broadloom carpets. Its low-odor, fast-grabbing formula provides quick tack, making it the ideal choice for heavy-duty installations and pattern carpet installations. The adhesive allows for adjustments during installation, ensuring precise pattern alignment while providing a secure bond. Not for use with PVC-backed floor coverings or carpet tiles.

### M45

#### High-Grab Wall Base Adhesive

M45 is a solvent-free, low-odor acrylic adhesive designed for vinyl, rubber, and specialty wall base installations. With exceptional wet grab and fast-setting performance, it ensures tight corners and a durable, impact-resistant bond. Compatible with a variety of substrates, M45 provides strong adhesion and long-lasting performance for interior wall base installations.

This product pairs with our trim solutions to create the perfect finishing touch.

## Gold

#### Premium-Performing Underlayment

Saves time with convenient fan fold, grid pattern for cutting, and pretaped sides. This versatile product is ideal for condos, multifamily housing, and residential projects with laminate or engineered hardwood flooring. Acting as a protective buffer, the premium underlayment enhances floor longevity, minimizing damage from daily wear and tear. Thermal insulating properties provide warmth and comfort underfoot for cozy living. Gold underlayment is made in the USA and includes a limited lifetime warranty.

## CLEANERS & TOOLS

### PerimeterSeal™

#### Floor Perimeter Waterproofing Technology

This easy-to-use tape covers the expansion gap with a water-tight seal, protecting the flooring and the subfloor. PerimeterSeal™ allows flooring to freely expand and contract while ensuring any waterproof warranty extends to the perimeter of the floor.

- Seals overlaps, transitions, and more.
- Easy and quick installation with no mess.
- Seals the perimeter for all floating floors.
- Can be used behind baseboards or quarter round.

| SKU              |       | Coverage | Unit Weight |
|------------------|-------|----------|-------------|
| Specialty Retail | PSTP  | 100 LF   | 7.5 oz      |
| BMF              | PSTPP |          |             |
| Karastan         | PSTPK |          |             |
| Aladdin          | PSTPA |          |             |

### ScentStop™

#### Bio-Enzymatic Odor Neutralizer

Bioengineered with beneficial bacteria and enzymes, ScentStop™ neutralizes the source of household odors so they won't resurface.

#### Any Household Odors

- Pet accidents
- Mold and Mildew Odors
- Food spills
- Leaky appliances

#### Any Surface

- Upholstery
- Walls (Watersafe surfaces. Test in an inconspicuous area)
- Baseboards
- Tackstrips
- Flooring
- Grout lines
- Wood and concrete subfloors

## TRIMS & TRANSITIONS

## Flooring Meets Its Match

Small details make all the difference. Performance Accessories trims and transitions are precision crafted and color matched to elevate the beauty of every space.

### Trims

No room is complete without our color-coordinated quarter round and universal wall base. These moldings provide the perfect finishing touches for any wood, laminate, or vinyl floor.

### Transitions

Color coordinated and engineered to fit right the first time, our multifunctional transitions simplify any flooring installation. Our 5-in-1 Transition acts as a T-molding, hard surface reducer, end molding, carpet reducer, and stair nose. Our 4-in-1 Transition acts as a T-molding, hard surface reducer, end molding, and carpet reducer.

## Easy To Install

Want to see how easy it is to install your staircase trims and accessories?

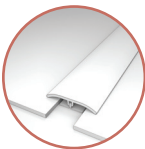

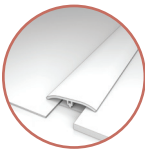

TRIMS & TRANSITIONS  
FOR VINYL

4-in-1 Multifunctional Transition

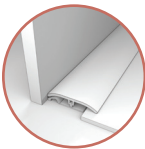

The 4-in-1 Transition is a versatile, multifunctional trim that combines four essential transition solutions into one product, designed to provide seamless transitions between different flooring types. This all-in-one solution offers maximum flexibility and clean, professional finishes for any space.

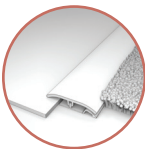

**T-Molding**  
Transitions between flooring of equal heights and in doorways.

**Hard Surface Reducer**  
Transitions between two floors of different heights.

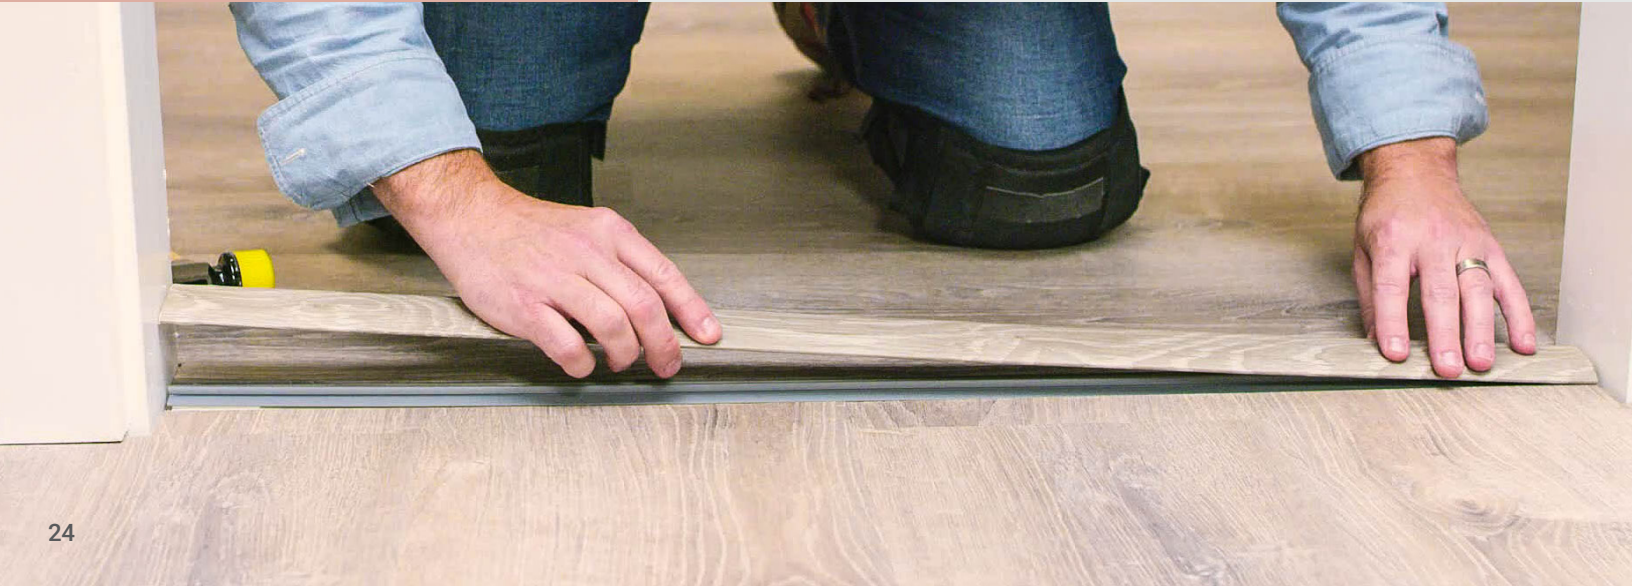

**End Molding**  
Finishes flooring where it meets sliding glass doors or vertical surfaces like a fireplace hearth.

**Carpet Reducer**  
Provides a smooth transition between hard surface flooring and carpet.

## TRIMS & TRANSITIONS FOR LAMINATE

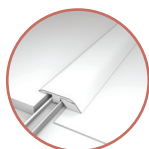

### 5-in-1 Multifunctional Transition

The 5-in-1 Transition is a versatile, multifunctional trim that combines five essential transition solutions into one product designed to provide seamless transitions between different flooring types. This all-in-one solution offers maximum flexibility and clean, professional finishes for any space.

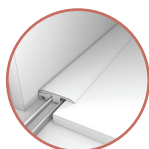

#### T-Molding

Transitions between flooring of equal heights and in doorways.

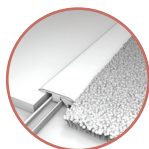

#### Hard Surface Reducer

Transitions between two floors of different heights.

#### End Molding

Finishes flooring where it meets sliding glass doors or vertical surfaces like a fireplace hearth.

#### Carpet Reducer

Provides a smooth transition between hard surface flooring and carpet.

#### Stair Nose

Finishes stairs or step-down areas when used with the 5BASE metal track. (Sold Separately.)

## TRIMS & TRANSITIONS FOR HARDWOOD

### T-Molding

The T-molding can be used to transition between floors of equal height, concealing cut ends and providing a beautiful finish in doorways and transition areas.

These durable, prefinished moldings coordinate beautifully in design and texture with floors, no painting or staining required.

| Specialty Retail SKU | BMF SKU | Karastan SKU | Length | Width | Height | Core Material | Surface Materials                |
|----------------------|---------|--------------|--------|-------|--------|---------------|----------------------------------|
| HTMDA                | PTMDA   | KTMDA        | 84"    | 2"    | 0.56"  | Solid Wood    | Highly Wear-Resistant UV Coating |

### Reducer

The reducer can be used for a smooth transition between floors of uneven heights, like wood floors to vinyl.

These durable, prefinished moldings coordinate beautifully in design and texture with floors, no painting or staining required.

| Specialty Retail SKU | BMF SKU | Karastan SKU | Length | Width | Height | Core Material | Surface Materials                |
|----------------------|---------|--------------|--------|-------|--------|---------------|----------------------------------|

## Elevate Your Surroundings

Carry the lifelong beauty of your floors onto your stairs with Flush Stair Noses with TrueMatch™, Full Stair Treads, and Stair Noses for the perfect fit, color, and warranty compatibility.

### Flush Stair Nose with **TrueMatch**

The TrueMatch™ Flush Stair Nose offers a perfect match in color, pattern, and features like embossed-in-register texture. These nosings provide a smooth, flush transition between the stair nose and flooring plank for a more flawless appearance. The TrueMatch™ Flush Stair Nose also preserves the integrity of the Uniclic® locking system, ensuring the flooring retains any waterproof warranties, even with the addition of the nosing.

### Full Stair Tread

Completely cover your stair step with a visually appealing and practical solution, instantly elevating the overall look of your staircase.

### Flush Stair Nose

Achieve a seamless and sophisticated look for your staircase with a smooth finish at the stair edge where the tread meets the riser. This product leaves a flush surface where the stair nose and flooring connect, elevating the overall aesthetic.

### Overlap Stair Nose

The perfect solution for the top step of your staircase, this product adds a stylish touch by overlapping the flooring on the back end for an attractive raised nosing appearance.

## Easy To Install

Want to see how easy it is to install your staircase trims and accessories?

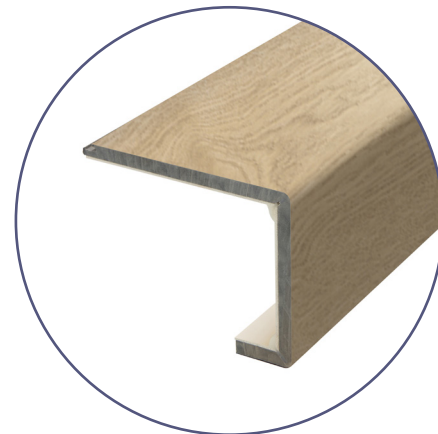

## STAIR SOLUTIONS FOR VINYL

### TrueMatch™ Flush Stair Nose

The vinyl flush stair nose with TrueMatch technology offers a perfect match in color, pattern, and features like embossed-in-register texture. These nosings provide a smooth, flush transition between the stair nose and flooring plank for a more flawless appearance. The TrueMatch flush stair nose also preserves the integrity of the Uniclic® locking system, ensuring the flooring retains any waterproof warranties, even with the addition of the nosing.

TreadBond™ adhesive makes installation simple – designed to work with all Performance Accessories® Stair Solutions.

STAIR SOLUTIONS  
FOR VINYL

Overlap Stair Nose

The vinyl stair nose provides a finished edge to coordinate with floor coverings on your staircase. The molding is designed with durability to handle the routine foot traffic along the edge of your stairs. This water-resistant molding can be installed along stairs in any room. The profile is user-friendly and easy to install.

These prefinished moldings coordinate beautifully in design and texture with floors, no painting or staining required.

 TreadBond® adhesive makes installation simple — designed to work with all Performance Accessories® Stair Solutions.

## STAIR SOLUTIONS FOR LAMINATE

### Overlap Stair Nose

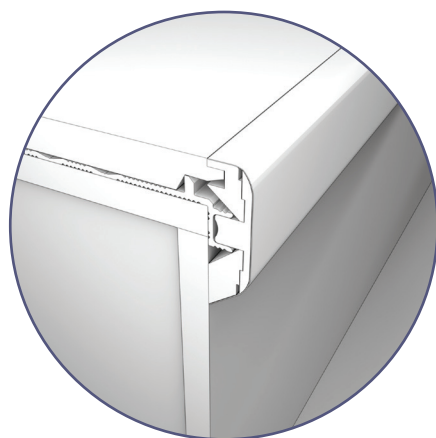

Get the same beautiful flooring throughout your home when you finish your project with a coordinated staircase. This overlap stair nose allows a smooth and secure finish when flooring planks are installed on stair treads. The durable decor is designed to handle everyday foot traffic on the edge of stairs, and the overlap design allows floors to float in necessary applications.

These durable, prefinished moldings coordinate beautifully in design and texture with floors, no painting or staining required.

 TreadBond™ adhesive makes installation simple — designed to work with all Performance Accessories® Stair Solutions.

| Specialty Retail SKU | BMF SKU | Karastan SKU | Length | Width | Height | Core Material | Surface Materials                                   |

### 5-in-1 Stair Nose

For a beautiful finished look, the 5-in-1 multifunctional molding can be used as a stair nose, coordinating with the laminate planks that cover your steps. Simply install this aluminum stair nose track and click the molding into place for a secure fit. The stair nose track comes with a 2 mm shim that raises the plank to the appropriate height of the stair nose molding.

 TreadBond™ adhesive makes installation simple — designed to work with all Performance Accessories® Stair Solutions.

| <b>Heavy Loads</b>  | Flooring can withstand heavy loads rolling across the floor on caster wheels up to 150 pounds per wheel.                                                                                                                                                                                                                                                                                                                                    |
| <b>Spread Rate</b>  | The amount of coverage which can be expected from a given amount of adhesive when spread using the recommended trowel.                                                                                                                                                                                                                                                                                                                      |
| <b>RH</b>           | Relative Humidity<br>The measurement of allowable moisture in a concrete slab for the adhesive to function properly.                                                                                                                                                                                                                                                                                                                        |
| <b>Base Formula</b> | The primary chemical that makes up the product. This is important when considering potential chemical interactions, especially for wood adhesives. Wood finishes may react with urethanes, which can cause a cloudy appearance. This reaction cannot be corrected once it has taken place.<br><br>Performance Accessories adhesives use modified urethanes and modified silanes, which are harmless to wood finishes and easily cleaned up. |
| <b>IIC</b>          | Impact Insulation Class<br>IIC is an acoustic or sound rating that indicates how well a floor assembly blocks impact vibrations, such as footfalls or dropped items hitting the floor. The higher the IIC rating, the better the assembly performs at blocking impact noises.                                                                                                                                                               |
| <b>STC</b>          | Sound Transmission Class<br>The rating system for measuring the ability of a partition to reduce the effect of airborne sound.                                                                                                                                                                                                                                                                                                              |
| <b>Tread</b>        | The horizontal surface of the stair you step on.                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>Nosing</b>       | The front edge of the tread that overhangs the riser.                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>Riser</b>        | The vertical space between each step or the "face of the step."                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Return</b>       | The finished edge or trim piece that is used to cover the exposed side of a stair tread, particularly when the stairs are open on one or both sides.                                                                                                                                                                                                                                                                                        |
