PERIMETERSEAL TAPE

PerimeterSeal tape seals the perimeter of a room, protecting both the flooring's surface at the perimeter and the subfloor.

WATERPROOF QUARTER ROUND†

These waterproof moldings cover the expansion space between the floor and wall and provide a water-tight seal.

QUARTER ROUND

These prefinished moldings cover the expansion space between the floor and the wall.

FLUSH STAIR NOSE

The flush stair nose creates a smooth and flush finish on the edges of steps where the flooring meets the transition.

OVERLAP STAIR NOSE

The overlap stair nose creates a transition to the edge of the step by overlapping the flooring on the back end instead of being flush.

WALL BASE†

The wall base creates a cover for the joint between the wall surface and the floor while protecting the wall from kicks and furniture dings.

† Available in white only.

The multifunctional 5-in-1 molding allows you to utilize a single transition to create five different applications.

CARPET TRANSITION

The carpet transition provides a smooth transition between your hard surface floor and carpet.

T-MOLDING

The T-molding is used to transition between flooring of equal heights and in doorways.

END MOLDING

The end molding can be used to finish flooring where it meets vertical surfaces such as walls, fireplace hearths, and sliding glass doors.

HARD SURFACE REDUCER

The hard surface reducer connects two floors of different heights.

STAIR NOSE*

The stair nose application provides a complete stair solution for both flush mount and overlap applications.

*Stair nose assembly requires additional purchase of the aluminum track (BBASE).
