

## Brew Worry-Free, Quality Coffee

### Trust the Solution Chosen by Leading Healthcare Providers

There are changes everyone is making to how we interact with shared spaces, but Keurig® remains positioned for continued hygienic brewing and has been embraced by over 350 U.S. hospitals that were heavily impacted by COVID-19.

### It's In Your Control

We believe that the most reliably made cup of coffee is one brewed on your own terms while using technology intended to provide minimal contact during brewing.

**Easy-to-clean touchscreens,  
buttons & handles**

**Non-porous surfaces that do  
not absorb bacteria or germs**

**Frequently accessed parts are  
removable for easy cleaning**

**Commercial Grade — Engineered  
for durability and reliability**

**2.75x**

Office decision makers are **2.75x** more likely to consider Keurig as a sanitary option over drip coffee<sup>1</sup>

**95%**

**95%** of consumers feel pre-packaged beverages & sealed, single-serve packages are safe<sup>1</sup>

**Air-tight seal for freshness**

**Double-wall design ensures coffee, tea, or cocoa inside is completely protected from external factors**

**Advanced technology keeps water and coffee untouched & safe from to start to finish of the brewing process**

## Productive Breaks Are Smarter Breaks

A critical part of keeping people safe at work is helping them stay at work. Beyond increased productivity, workplace coffee helps alleviate the burden on protective infrastructure.
